EGEA

A simply shaped fountain consisting of an S235JR steel Ø190mm. tube with front panel, button and tap made of AISI 304 stainless steel. The base plate is trapezoidal, though a semi-circular or circular plate is available for the version with a double tap.

Height above ground level: 103 cm

Depth: 72 cm Length: 180 cm Weight: 52 kg

LILLA

An AISI 304 stainless steel fountain with a sinuous, tubular structure and base plate with laser-cut grooves for water drainage. A push-button tap with a timer at the top of the tube means that it is possible to drink both at the top and the bottom of the fountain. The bowl at the base fills with water and serves as a drinking trough for animals.

Height above ground level: 100 cm

Depth: 68 cm Length: 60 cm Weight: 32 kg

ONEBAR

A distinctive, AISI 304 stainless steel fountain dedicated to the urban cyclist. Pressing the handle of the pump-shaped rod once, starts a timed flow of drinking water. Technical specifications

Height above ground level: 105 cm

Depth: 37 cm

Length: 57 cm

Weight: 25 kg

BRIDGET

A double fountain made of a bridge-shaped, AISI 304 stainless steel tubular system with a square section. By pressing one of the two buttons at the ends of the horizontal bar, water flows from the top or the bottom of the structure as needed. The grill at the base is made of AISI 304 stainless steel.

Height above ground level: 108 cm

Depth: 48 cm Length: 80 cm Weight: 45 kg

GIRAQUE

This giraffe-shaped, S235JR steel fountain is especially popular with children. By pressing the giraffe's curved tongue, you get water. Moving the head up or down changes the direction of the jet, so you can either drink directly from it or fill a bottle. The grill at the base is made of AISI 304 stainless steel.

Height above ground level: 93 cm

Depth: 29 cm Length: 80 cm Weight: 55 kg

Our range of Drinking Fountains has been created to provide safe, clean and cost effective public drinking facilities that are ideal for public environments.

Each unique design has its own set of customizable features, enabling the Drinking Fountains to be matched with other assets and integrated seamlessly into any environment.

The option to customise the colours, materials used and finishing options allows the Furphy Foundry range of Drinking Fountains to fit into any public environment.

CASCADE DRINKING FOUNTAIN

Description

Made from hot dipped galvanised mild-steel pipe, our Cascade Drinking Fountain comes in two unique formats - regular and wheelchair access. Both can be finished in an array of colouring options.

Our range of Drinking Fountains has been created to provide safe, clean and cost effective public drinking facilities that are ideal for public environments. Each Drinking Fountain has been manufactured under strict quality guidelines based on a commitment developed over the past 150 years.
