| ARTIFICIAL TREES & PLANTS

PHOENIX

ROBELLINI

DACTYLIFERA

WASHINGTONIA

Palms have been frozen by a modern system and their organic functions were terminated. Therefore, our products are exactly the same as their originals in appearance and these plants do not require any light, water, disinfecting, pruning, or any other maintenance and care.

These type of preserved plants are being used worldwide. The body section and the leaves of the trees are completely made of Palm Trees and Pheonix Trees. 1 meter of body section weighs approximately 7-10 kgs. A special disinfection and protection liquid is used against deformation.

Washingtonia Palm Trees and Pheonix Palm Trees can be produced from 2 meters to 18 meters in height, straight, or curved. Mixture designs with 4 or 5 trees together are also available. The leaves can be mounted as phoenix or palm tree.

The Advantages of Preserved palm Trees:

- No extra cost, no light needed
- No pruning, no water needed
- No risk of disease, no fertilizers needed
- No disinfection needed, no risk of deformation
- No soil care, it is lightweight
- Moved easily, assembled easily

PHEONIX PALM

Trunk:

Height 2.5-18 meters

Composite fire retarded inner section with steel core.

Straight, naturally curved and/or tapered.

Outer covering of natural palm bark.

Nominal diameter 50-75cm

Flare at base 60-100cm

Leaves:

Phoenix canariensis palm frond preserved by natural absorption techniques. Frond length up to 2.25 meters. Foliage canopy diameter up to 4.50 meters. Self-supporting. Do not require special shipping conditions.
