DJ POST

Music is a passion for most people young and old so what better way to bring a play, skate, or other urban or community space to life than with this DJ post? It has been designed for the urban public environment - all you need is your smartphone with music and some energy to turn the crank to power up the DJ post - no power source required.

GAMENETIC

This highly interactive Gamenetic is great fun for all ages and can be a social or solitary games which challenges problem solving and coordination. As with the other interactive products it requires the user to power up the post with the pedal, and then the fun begins. The 2 buttons on either side of the Gamenetic are pressed in response to the instructions given.

AUDIONETIC

The Audionetic Series is quite an extensive family of products which offers anything from trivia, stories, fitness, music, history, jokes and much, much more. The post is powered up by pumping the pedal. Stories or music will begin to play at random or from the start of a history, trivia or fitness lesson which could be customised to its location.

KINETIC WHEEL

The Kinetic Wheel brings life to themed play areas and historical sites or areas of public interest that have anything to do with transport! Powered purely by kinetic energy there are 3 different wheels available to emulate ships, race cars and trucks and all make the noise of the vehicle and a range of other noises to bring imaginations to life!

JUMP STONE

The Jump Stone has the same play characteristics as a trampoline but this is designed to reuse the energy created from jumping to playing music! It's a great way to learn how energy is created and can be used in such a positive way - as well as getting fit and improving balance and coordination.

PROTECTME

MUSIC BALL

These are lovely interactive features that play either a choice of songs or stories. There is no need for electricity, all it requires is for the child to push the crank round. The crank can be used even by those who have limited upper mobility as the slightest movement will start the music/story.

TALK STATION

Rotate the inclusive smiley face, watch the power meter build up with the led display as you generate power. Designed to be operated at wheelchair height.
